

CALVES

ORDER OF EVENTS

LEADING - OBSTACLE COURSE - REARING

LEADING: Each age group ring will get its own placings. All those placed first and second in each ring will then go to the centre calf ring for a lead off before the next event starts. This involves the individual ring winners leading off against each other. Once the overall winner is selected (CHAMPION) the person who came second to them in their age group ring is called in to lead in case they are second overall (RESERVE CHAMPION). The other second placed children will not be called into the championship ring at all.

OBSTACLE COURSE: The same process is followed as leading, but in this event children lead their calf through a gate, over some posts and zigzag through some cones. Age group winners then compete for the Champion Ribbon. Please note that the turn at Peg 2 is a normal left hand turn for the obstacle course.

REARING: All children take their animals into their age group ring together for judging. Once this is completed the three ring winners go into the centre ring to find the overall winner for rearing (Champion). The child placed second to the overall winner in the age group ring is called for judging in case they are overall (Reserve Champion).

There are also winners for each of the grades and an overall Champion Calf. These are points decisions based on results during the day.
